Building Profile

📍 Location
New York, NY 10023

🏠 Gross Floor Area
477,300 Square feet

🏢 Property Type
Mixed Residential and Commercial

📅 Year of Built
1965

After the energy study and analysis, **NY Building Systems Consultant Inc (NYBSC)** identified big annual energy and cost savings from the Elevator modernization. NYBSC was able to save huge amount of peak demand **63.5kW**. NYBSC also collected the rebate from ConEdison. The initial estimated rebate was **\$31K**, but NYBSC was confident to manage more incentives. NYBSC worked very closely with Measurement and Verification (M & V) team and finally able to collect **\$173K** rebate.
